

DASHBOARD

1. Operational & Delivery Performance

These KPIs track the reliability of your fleet and supply chain execution.

- **On-Time Delivery (OTD):** Percentage of shipments that arrive by the committed date and time.
- **On-Time In-Full (OTIF):** Percentage of orders delivered on time, complete, and with zero damage.
- **Truck Turnaround Time:** Total time a vehicle spends at a dock-yard from arrival to departure.
- **First Attempt Delivery Rate (FADR):** Percentage of deliveries successfully completed on the first attempt.
- **Damage and Claim Rate:** Percentage of goods damaged or lost during transit against total volume transported.
- **Transit Time:** The total time elapsed between pickup and delivery.

2. Cost & Profitability

These financial indicators monitor your bottom line.

- **Cost-Per-Mile (CPM):** Total operational costs (fuel, maintenance, driver wages) divided by total mileage.
- **Revenue Per Mile (RPM):** Gross revenue generated per mile driven.
- **Freight Cost per Shipment:** The overall cost required to move a single shipment from origin to destination.
- **Empty Load Rate:** Percentage of miles driven without cargo (deadhead), indicating route inefficiency.
- **Total Cost of Ownership (TCO):** Comprehensive cost of operating a specific vehicle or fleet asset, including depreciation.

3. Fleet & Asset Utilization

Measures how well you are leveraging your physical trucks and equipment.

- **Asset Utilization Rate:** The percentage of time a truck is actively operating or available for dispatch.
- **Load Capacity Utilization (Fill Rate):** Percentage of available cargo space actually used (weight or volume).
- **Fuel Efficiency:** Average fuel consumed per distance traveled (e.g., miles per gallon or liters per 100 km).
- **Maintenance Cost Per Mile:** Routine and emergency repair costs divided by total miles driven.
- **Breakdown Rate:** The total number of unexpected mechanical failures over a set period.

4. Driver & Safety Performance

These metrics evaluate personnel productivity and adherence to safety regulations.

- **Driver Idle Time:** Total amount of time a truck's engine is running while the vehicle is stationary.
- **Hours of Service (HOS) Compliance:** Rate of compliance or violations regarding maximum driving hours.
- **Safety Incidents:** DOT reportable incidents, speeding, or harsh braking events per driver.
- **Driver Turnover Rate:** The rate at which drivers leave the company, highlighting retention health.

5. Customer Service & Financial Back-Office

Tracks the administrative efficiency and the end-user experience.

- **Freight Billing Accuracy:** Percentage of invoices sent to clients with zero discrepancies, ensuring rapid cash flow.
- **Invoice Processing Time:** Time taken from job completion to sending the final invoice.
- **Customer Satisfaction Score (CSAT) & NPS:** Client feedback metrics regarding communication and service quality.

Other notes:

1. Clickable icons. Be able to open the tabs/icons and see more details
2. Above metrics. Many are already there but maybe we align with categories

ORDERS

1. General & Organizational Information

- **Order Number / Job ID:** Unique system identifier.
- **Order Date & Time:** Timestamp of when the order was placed.
- **Customer / Client Name:** The party responsible for payment.
- **Branch / Division:** The operating location handling the job (e.g., Dar es Salaam port office).
- **Salesperson / Account Manager:** Employee credited with the sale.
- **Incoterms:** Standard trade terms defining responsibility for the cargo (e.g., FOB, CIF).
- **Payment Terms:** Net days, credit limits, or prepayment requirements.

2. Parties Involved

- **Shipper / Consignor:** The entity sending the goods.
- **Consignee:** The entity or individual receiving the goods.
- **Bill-To Party:** The entity responsible for paying the freight invoice.
- **Notify Party:** The contact notified upon cargo arrival or status changes.

3. Locations & Routing

- **Pickup Location (Origin):** Address, dock, or terminal.
- **Delivery Location (Destination):** Final drop-off address.
- **POL & POD:** Port of Loading and Port of Delivery (for maritime/air freight).
- **ETD & ETA:** Estimated Time of Departure and Estimated Time of Arrival.
- **Routing Instructions:** Specific stops, transshipment points, or restricted zones.

4. Cargo & Equipment Details

- **Equipment Type:** Mode and type of conveyance (e.g., flatbed, reefer, 20ft container, LTL).
- **Total Weight:** Gross and net weight of the cargo.
- **Dimensions:** Length × Width × Height per piece.
- **Volume (CBM):** Cubic meters utilized.
- **Piece Count:** Number of pallets, boxes, or parcels.
- **Commodity Description:** Text description of the goods being moved.
- **Hazardous Materials (HAZMAT):** UN numbers, class, or packing group for dangerous goods.

5. Financials & Billing

- **Freight Rate:** The agreed price per unit (e.g., rate per ton, per mile, or flat job rate).
- **Accessorial Charges:** Extra fees for services like detention, tarping, or liftgate.
- **Currency:** Applicable currency (with multi-currency conversion for international transport).
- **Taxes:** Applicable local/regional value-added taxes (VAT) or tariffs.

6. Documentation & References

- **Customer PO Number:** The client's original purchase order number.
- **Master/House B/L or AWB:** Master and House Bill of Lading or Air Waybill numbers.
- **Customs Details:** Harmonized System (HS) codes and customs tariff numbers.
- **Special Instructions:** Specific loading/unloading rules, temperature limits, or seal numbers.

Other notes:

1. After clicking “New Order” if you click one of the selection “Client” or “Corridor” but don’t select anything, the window closes. This shouldn’t happen
2. All selections should be drop down

TRIPS

1. Trip & Vehicle Details

- **Trip Number:** System-generated unique identifier.

- **Vehicle/Truck ID:** License plate or asset number.
- **Trailer ID:** Connected trailer or container number.
- **Driver 1 & Driver 2:** Assigned personnel (linked to HR/Payroll).
- **Trip Status:** e.g., *Planned, Dispatched, In-Transit, Delivered, Billed*.
- **Start Date & Time:** Planned and actual departure.

2. Route & Location

- **Origin Facility:** Terminal, warehouse, or pickup location.
- **Destination Facility:** Final drop-off point.
- **Via Points:** Transit hubs, border crossings, or required checkpoints.
- **Distance:** Planned vs. actual kilometers.
- **Route Code:** Pre-defined route template (if applicable).

3. Freight & Cargo

- **Consignment/Waybill Number:** Reference for the goods being carried.
- **Customer/Client ID:** The entity being billed.
- **Cargo Weight & Volume:** Gross/net weight or cubic meters (used for capacity limits).
- **Number of Packages:** Pallets, boxes, or bulk volume.
- **Special Handling:** e.g., *Hazardous (Hazmat), Refrigerated, Oversized*.

4. Financials & Costs

- **Freight Revenue:** Amount to be billed to the client.
- **Advance Payments:** Cash or fuel cards given to the driver.
- **Driver Wages:** Fixed pay, per-diem, or commission per trip.
- **Toll/Permits Expense:** Expected and actual costs for roads and borders.
- **Miscellaneous Expenses:** Loading/unloading fees, parking.

5. Fuel Management

- **Fuel Type:** e.g., *Diesel*.
- **Fuel Card Number:** ID of the card issued for the trip.
- **Planned Refueling Stations:** Pre-approved network stops.
- **Fuel Quantity (Liters):** Amount purchased at each stop.

6. Compliance & Safety

- **E-Way Bill / Customs Reference:** Regulatory numbers required by local authorities.
- **Delivery Proof:** Signature or electronic POD (Proof of Delivery) upload.
- **Seal Numbers:** Security tag numbers on the container.
- **Incident Reports:** Fields to log breakdowns, accidents, or delays.

CHART OF ACCOUNTS

1. General Account Information (Header Level)

These core fields define the absolute identity, classification, and function of the GL account.

- **Account Code/Number:** A unique numeric or alphanumeric identifier. In the transport industry, these are typically grouped by range (e.g., 1000-1999 for Assets, 5000-5999 for Revenue).
- **Account Name/Description:** The title of the account (e.g., *Fleet Fuel Expense* or *Freight Revenue*).
- **Account Type / Category:** Defines the base financial statement category (Asset, Liability, Equity, Revenue, or Expense).
- **Account Sub-type:** Further classifies the main type for reporting (e.g., Fixed Asset, Current Liability, Cost of Goods Sold/Direct Costs).
- **Account Usage / Posting Type:** Determines whether the account can accept direct journal postings, is used for headers, or acts as an end-total for roll-ups.

2. Transport & Industry-Specific Dimensions

These fields are customized to capture the unit economics of a transportation and logistics business.

- **Vehicle / Fleet Segment:** Attaches transactions to a specific vehicle, truck number, trailer, or fleet classification.
- **Route / Corridor:** Tracks revenue and direct operational costs against specific shipping lanes or geographical transport corridors.
- **Profit Center / Cost Center:** Segments your ledger by operational divisions (e.g., Long-Haul, Last-Mile Delivery, Warehousing).

3. ERP-Specific Configuration Fields

These fields tell the ERP how to process multi-currency, tax, and automated journal entries.

- **Company Code:** Ties the account to a specific legal entity or regional branch.
- **Currency:** Defines the operational currency for the account (crucial for cross-border logistics and international freight).
- **Tax Code / Category:** Assigns default tax settings (e.g., VAT, customs, or fuel tax) to control automatic tax calculations.
- **Reconciliation Account:** Specifies whether this account (like Accounts Receivable or Accounts Payable) connects to sub-ledgers, preventing manual journal entries.
- **Posting Period Variant / Fiscal Year:** Restricts the account to specific active accounting periods (e.g., Q1, Fiscal Year 2026).

4. Control and Status Fields

These fields manage user access, auditing, and maintenance.

- **Status (Active / Inactive):** Enables or disables an account from accepting future journal entries.
- **Allow Manual Posting:** A toggle determining if users can directly debit/credit the account without it coming from an automated sub-ledger process.
- **Budgeting Allowed:** Enables the account to be mapped for future operational budgets (e.g., setting a monthly cap for fuel spend).

- **Consolidation Account:** Used to map local subsidiary accounts to a parent company's global COA for corporate reporting.

JOURNAL

1. Document Header & Core Accounting

- **Company Code / Entity:** The specific operating branch or subsidiary within your transport group.
- **Journal/Document Type:** Classifies the entry (e.g., General, Accrual, Depreciation, Cash Disbursement).
- **Document Date:** The actual date the transaction occurred.
- **Posting Date:** The date the transaction affects the general ledger.
- **Currency:** The currency for the transaction (with exchange rate fields if dealing with cross-border transport).
- **Reference Document Number:** Links to external documents, such as a Bill of Lading, CMR Waybill, or vendor invoice.
- **Header Text / Header Memo:** General notes regarding the transaction.

2. Line Item & Ledger Details

- **General Ledger (G/L) Account:** The account being debited or credited (e.g., Fleet Fuel Expense, Freight Revenue).
- **Debit / Credit Amount:** The monetary value in the transaction currency.
- **Tax Code / Category:** Determines the applicable VAT or sales tax.
- **Line-Item Text / Narration:** Specific operational notes (e.g., "Diesel top-up Dar to Arusha route").
- **Open Item Reference:** Used for matching specific items (e.g., matching a freight invoice payment to the original receivable).

3. Transport-Specific Operational Dimensions

These specialized fields allow transport and logistics companies to calculate route and vehicle profitability:

- **Vehicle / Fleet ID:** The exact truck, trailer, or vessel involved to track maintenance, wear, and specific asset profitability.
- **Route ID:** Identifies the specific delivery route or corridor to measure route-specific margins.
- **Cost Center / Profit Center:** Attributes the cost or revenue to a specific terminal, depot, or business unit.
- **Driver ID:** Links expenses (like per diems or fines) or revenues to the responsible driver.
- **Customer / Vendor Code:** Identifies the specific shipper, consignee, or transport sub-contractor associated with the freight.
- **Project / Trip Number:** Attaches the journal line to a specific haulage contract or logistical project.

VENDOR

1. General & Organizational Data

These fields define the vendor's basic identity and categorizations.

- **Vendor/Business Partner Code:** Unique system identifier (auto-generated or manual).
- **Vendor Type/Category:** e.g., Carrier (FTL/LTL), Freight Broker, Owner-Operator, Sub-contractor, Fuel Vendor, Workshop.
- **Company/Legal Name:** Registered business name.
- **Operating Name (DBA):** Doing Business As name.
- **Search Term/Alias:** Abbreviated code or nickname for quick lookup.
- **Parent/Holding Company:** Maps corporate hierarchy for spend roll-ups and parent-child invoicing.

2. Contact & Compliance Details

Critical for communication, location mapping, and legal compliance.

- **HQ Address & Branch Addresses:** Origin/Destination terminals, pickup or drop-off locations.
- **Contact Person(s):** Dispatch, Billing, and Account Manager contacts.
- **Tax Identification Number (TIN) / VAT ID:** For tax compliance and reporting.
- **Insurance Details:** Fields for Carrier Liability, Cargo Insurance, and Workers' Compensation.
- **Insurance Expiry Dates:** Triggers to block freight dispatch if certificates expire.
- **Licenses/Certifications:** Fields for authority numbers (e.g., USDOT or local equivalent, Hazmat certified).

3. Financial & Accounting Data

These fields establish how invoices are validated and paid.

- **Payment Terms:** e.g., Net 15, Net 30, Pay-When-Paid (crucial for freight brokers).
- **Currency:** Transaction currency for international/cross-border loads.
- **Reconciliation Account:** Links vendor sub-ledger to the General Ledger.
- **Tax Group:** Determines applicable withholding or sales taxes.
- **Bank Details:** Bank Name, SWIFT, IBAN, or Mobile Money details for remittance.
- **Payment Methods:** e.g., EFT, Wire Transfer, Cheque, Fuel Card.

4. Transport & Operations (TMS) Specifics

Industry-specific fields that seamlessly integrate the ERP with your Transportation Management System (TMS) or Fleet Management modules.

- **SCAC Code:** Standard Carrier Alpha Code (mainly for freight/shipping).

- **MC/DOT Numbers:** Motor Carrier / Department of Transportation numbers for regulatory checks.
- **Equipment Types Supported:** e.g., Flatbed, Dry Van, Reefer, Tanker, Curtain-side.
- **Fleet Size/Capacity:** Total number of trucks/trailers available for allocation.
- **Rate Agreements:** Default contract rates, fuel surcharge (FSC) formulas, or lane-specific pricing parameters.
- **EDI/API Integration:** Fields to store EDI profiles, Webhook URLs, or communication protocols for automated load tracking.

ACCOUNTS PAYABLES

1. General Invoice & Header Fields

These fields govern the basic auditability, timing, and financial identity of the invoice.

- **Vendor / Carrier Name:** Registered company name of the transport provider.
- **Vendor / Carrier Number:** Unique ERP system identifier for the supplier.
- **Invoice Date:** The date the carrier issued the bill.
- **Posting Date:** The date the financial transaction is recorded in the General Ledger (GL).
- **Payment Due Date:** The date payment must be remitted.
- **Payment Terms:** Net 30, Net 15, or conditional terms.
- **Invoice Number:** Unique alphanumeric string provided by the supplier.
- **Invoice Amount:** Total billed value, including all charges and taxes.
- **Currency:** Transactional currency (crucial for international logistics/cross-border trucking).

2. Operational & Shipment Details

These transport-specific fields connect the financial invoice to physical freight movement and are used for "three-way matching" (Purchase Order / Rate Agreement → Shipment Execution → Invoice).

- **Bill of Lading (BOL) Number:** The primary contract and receipt for the freight.
- **Delivery Note / POD (Proof of Delivery) Number:** Reference validating goods were delivered.
- **Shipment / Load ID:** Unique identifier for the trip or dispatch.
- **Driver / Fleet / Truck Number:** Identifying details for the specific asset or personnel used.
- **Origin Location:** Start point of the transport leg.
- **Destination Location:** End point of the transport leg.
- **Distance (Mileage):** Operational distance covered, particularly for owner-operators or dedicated fleets.

3. Financial & Cost Distribution (Line-Item Level)

These fields ensure the expenses hit the correct accounts and operational cost centers within the transport business.

- **GL (General Ledger) Account:** The specific account mapped to the expense (e.g., Fuel, Tolls, Driver Wages, Maintenance).
- **Cost Center / Department:** The internal division responsible for the expense.
- **Base Freight Charge:** Core cost of moving the load.
- **Fuel Surcharge (FSC):** Additional charge applied based on fluctuating diesel or fuel costs.
- **Accessorial Fees:** Extra charges for specific services (e.g., detention, layover, lumpers/handling, tarping).
- **Tolls & Permits:** Bridge/road tolls or border crossing permits.
- **Tax Code:** Jurisdictional tax handling (e.g., local VAT/GST, cross-border tax).
- **Customs Duties / Brokerage Fees:** Fees incurred during cross-border transit.

4. Matching & Verification Fields

These fields are used for rate auditing to prevent overbilling and duplicate payments.

- **Purchase Order (PO) Number:** The agreed-upon framework or job order number.
- **Rate Contract ID:** The specific negotiated rate agreement associated with the carrier.
- **Rate Basis:** How the rate is calculated (e.g., per mile, per weight, flat fee).
- **Weight / Volume:** Billed weight or volume compared against the physical manifest.

5. Advanced / Compliance Fields

Required for advanced AP automation and cross-border or localized compliance.

- **Electronic Invoice (e-invoicing) Reference:** Required for Peppol or regional tax authority e-invoicing compliance.
- **Taxpayer Identification Number (TIN) / VAT Number:** The carrier's tax registration.
- **HS Codes (Harmonized System Codes):** Required for customs and cross-border freight.

CUSTOMERS

1. General & Basic Information

- **Customer Account Group:** Defines the customer type (e.g., Sold-to, Ship-to, Bill-to, Payer).
- **Customer Name / Company Name:** Legal entity name.
- **Search Term:** A short code or abbreviation for quick system lookups.
- **Industry Type:** Sector classification.
- **Tax Identification Number / VAT Number:** Required for legal and tax compliance.
- **Registration Number:** Company registration or business license number.

2. Address & Location Details

- **Street, House Number, City, State/Province:** Physical location.
- **Postal Code / Zip Code:** Crucial for distance and rate calculations.
- **Country:** Determines international shipping and tariff rules.
- **Latitude/Longitude (Geo-codes):** Used by ERP systems to pinpoint exact docks or remote pick-up points.
- **Transportation Zone:** Geographical grouping used by route optimization algorithms to determine logistics networks.
- **Time Zone:** Required for scheduling precise pick-up and delivery windows.

3. Contact Information

- **Primary Contact Name:** Key person to reach out to.
- **Phone Number / Mobile Number:** Direct communication lines.
- **Email Address:** Used for automated shipping notifications and proof of delivery (POD).
- **Website:** Corporate URL.
- **Department / Role:** Defines the customer's operational structure.

4. Transport & Logistics-Specific Fields

- **Shipping Conditions:** Dictates standard dispatch rules (e.g., immediate, normal).
- **Delivering Plant / Warehouse:** The primary facility associated with the customer's freight.
- **Means of Transport:** Preferred vehicle types (e.g., flatbed, refrigerated, LTL/FTL).
- **Dock / Gate Access Restrictions:** Notes on whether the site accommodates specific truck sizes or specific hours of operation.
- **Loading / Unloading Requirements:** Tail-lift needed, forklift required, or pallet exchange agreements.

5. Financial & Billing Information

- **Currency:** Transactional currency for billing.
- **Incoterms:** Standardized commercial terms (e.g., FOB, CIF, EXW) outlining responsibilities for freight costs and risk.
- **Payment Terms:** Agreed-upon payment deadlines (e.g., Net 30, Cash on Delivery).
- **Reconciliation Account:** The General Ledger (GL) account for accounts receivable.
- **Credit Limit:** Maximum allowed outstanding balance for the customer.
- **Tax Code / Exemption Status:** Specific tax jurisdictions or exemptions applied to the freight bill.

6. Operational Preferences

- **Preferred Carrier:** Specific logistics provider to use for this customer.
- **Delivery Priority:** Standard priority level for fulfilling orders.
- **Order Combination:** Indicates if multiple orders can be combined into a single shipment (consolidation).
- **Communication Language:** Preferred language for generating waybills, bills of lading, and invoices.

ACCOUNTS RECEIVABLES

1. Header Information (Applies to the entire invoice)

Header fields define who is paying, when they are paying, and core administrative references.

- **Customer/Client Name:** The legal business name of the broker, shipper, or consignee billed.
- **Customer Account Number:** Unique ERP identifier for the customer.
- **Invoice/Document Number:** Unique, sequentially generated tracking number for the transaction.
- **Document Date / Invoice Date:** The date the invoice is issued.
- **Posting/Tax Date:** The date the transaction impacts the General Ledger.
- **Currency:** The currency for the transaction (e.g., TZS, USD, EUR).
- **Payment Terms:** Agreed-upon terms (e.g., Net 15, Net 30, Cash on Delivery/COD).
- **Due Date:** Automatically calculated based on the Payment Terms.
- **Purchase Order (P.O.) Number:** Client's reference number, often mandatory for corporate shippers.
- **Sales Order / Contract Reference:** Ties the invoice to a master rate agreement or specific sales order.

2. Operational & Transport Specifics (Logistics Context)

Unlike retail, transport AR relies heavily on operational variables that validate the shipment.

- **Dispatch / Job ID:** Unique identifier for the specific trip or move.
- **Bill of Lading (BOL) Number:** The primary legal contract and receipt for the freight.
- **Delivery Order / Proof of Delivery (POD):** Number confirming the goods were received without dispute.
- **Shipment Date:** Date and time the freight was picked up / delivered.
- **Origin / Destination:** Locations of the load to verify routing and zones.
- **Equipment / Vehicle ID:** License plate, trailer number, or container ID used for the transport.
- **Driver ID:** Name or code of the operator (useful in fleet-focused systems).
- **Reference Document Type:** Often classifies whether the document is a Freight Order, Air Waybill, or Voyage.

3. Line Items (Details of the charges)

Line items break down individual costs. Most transport ERPs allow multiple lines per invoice.

- **Item Description:** Details of the service (e.g., Line Haul, Fuel Surcharge, LTL Base Rate).
- **Line Item Type / Product Code:** Accounting code used to route revenue to the correct General Ledger (GL) account.
- **Unit of Measure:** Distance, weight, or quantity used to calculate the rate (e.g., Miles, Kilograms, Tons, TEUs).
- **Quantity / Distance:** Number of miles driven or weight of the cargo.

- **Rate:** Cost per unit (e.g., \$1.50 per mile).
- **Amount / Subtotal:** The calculated line value (Quantity × Rate).

4. Accessorial & Surcharge Fields

Transport companies have dynamic cost layers added to base rates.

- **Fuel Surcharge (FSC):** Calculated either as a flat fee or a percentage tied to regional diesel index data.
- **Detention / Demurrage Charges:** Fees applied when a driver is delayed at a loading/unloading dock.
- **Layovers / Waiting Time:** Extra charges for delayed routes.
- **Tolls / Permits:** Reimbursable Road fees, border crossing charges, or specialized permits.
- **Accessorial Description:** Specific notes for extra services like "Liftgate," "Inside Delivery," or "Refrigeration".

5. Tax & Financial Controls

- **Tax Code:** Specifies VAT or state/national tax regulations.
- **Tax Jurisdiction:** Location where taxes are applied (crucial for cross-border logistics).
- **Reconciliation Account:** The General Ledger (GL) account that groups AR for the balance sheet.
- **Profit Center:** Internal department or division tracking the revenue (e.g., Long Haul, Flatbed, Logistics).

6. Accounting / Audit Trails

- **Header Text:** General notes or delivery instructions.
- **Line Item Text:** Specific remarks relating to a single charge.
- **Attachment / Document Link:** Fields used to upload an electronic copy of the Bill of Lading or Signed POD directly into the ERP.

Credit & Collections

1. Customer & Account Profile Fields

These core data fields establish the client identity and their overarching credit boundaries.

- **Account/Customer Number:** Unique identifier for the freight broker, shipper, or corporate client.
- **Customer Name:** Registered legal business name.
- **Parent Account:** Links subsidiary accounts to a master corporate organization for consolidated credit limits.
- **Tax ID / VAT Number:** Essential for cross-border or regional tax compliance.
- **Billing Address:** Address where invoices, statements, and dunning letters are sent.
- **Account Status:** Current state of the account (e.g., Active, On-Hold, Suspended, In Collections).

2. Credit Limits & Risk Evaluation Fields

These fields automate risk assessment and govern how much credit can be safely extended before halting order dispatch.

- **Credit Limit Amount:** The maximum monetary balance the customer is permitted to owe at any given time.
- **Credit Rating / Score:** The client's financial standing, often auto-pulled or manually input from third-party agencies (e.g., [Dun & Bradstreet](#)). **Not sure if we have this in the region but if we can have this it would be great**
- **Temporary Credit Limit:** An approved, time-bound increase in the credit limit for seasonal spikes in shipments.
- **Currency:** Defines the monetary unit for the credit limit.
- **Credit Exposure (Total):** The calculated sum of current outstanding invoices, open unbilled consignments, and pending freight orders.
- **Available Credit:** Calculated field: Credit Limit Amount - Credit Exposure.
- **Credit Hold Override Flag:** Permission settings determining if a dispatcher can create a new load/trip when the customer exceeds their credit limit.
- **Review Date:** The scheduled date for the next periodic financial review of the customer's credit limits.

3. Payment Terms & Billing Rules

These fields outline the payment agreements and determine when a shipment's invoice officially becomes past due.

- **Payment Terms Code:** The code determining standard due windows (e.g., Net 15, Net 30, Net 60).
- **Discount Percentage:** Early payment incentives (e.g., 2% discount if paid within 10 days).
- **Discount Days:** The timeframe during which early payment discounts are applicable.
- **Credit Period (Days):** The maximum days allowed after the invoice date before the invoice goes into collections.
- **Interest / Penalty Rate:** The percentage rate applied to overdue balances.
- **POD Required Flag:** A setting that dictates whether an invoice is valid for collections only after the Proof of Delivery is uploaded and verified.

4. Collections & Dispute Management Fields

These fields manage the dunning (reminder) process and track accounts that are delinquent.

- **Dunning Level:** Indicates how far along the collection sequence the customer is (e.g., Level 1, Level 2, Level 3 / Legal).
- **Collection Strategy:** The automated workflow assigned to the customer (e.g., High-Risk vs. Standard Carrier).
- **Collector ID / Specialist:** The assigned internal accounts receivable representative.
- **Last Contact Date:** The date of the last email, call, or letter sent regarding outstanding invoices.
- **Promise to Pay Date:** The specific date the customer agreed to settle their past-due balance.

- **Promise to Pay Amount:** The monetary amount the customer has pledged to pay on a given date.
- **Dispute Status:** Current state of an invoice being contested (e.g., Open, Under Investigation, Resolved, Written Off).
- **Disputed Amount:** The total dollar value of the invoices currently held in dispute.
- **Collection Notes:** Free-form text fields for collectors to log details of conversations or specific shipment issues.
- **Write-Off Amount:** The uncollectible balance officially marked off as a bad debt.

Cash & Bank

Header Details

- **Transaction ID / Voucher No:** Unique system-generated number for tracking.
- **Entry Date:** The date the transaction is recorded.
- **Posting / Value Date:** The date the funds actually affect your bank account.
- **Document Number:** The original receipt, invoice, or voucher number from the supplier or bank.
- **Transaction Type:** Specifies whether the entry is a Receipt (Cash/Bank In) or a Payment (Cash/Bank Out).

Bank & Account Information

- **Account Type:** Defines whether the account is a Cash Account, Chequing/Savings Account, or Corporate Credit Card.
- **Bank / Cash Account:** The specific company account the money is coming from or going into.
- **Payment Mode:** The method of transfer (e.g., Cash, Check, Wire Transfer, Electronic Funds Transfer).
- **Payment Term / Status:** Indicates if the payment is cleared, in draft, or requires reconciliation.

Transaction & Amount Details

- **Currency:** The currency in which the transaction is processed.
- **Exchange Rate:** The conversion rate if dealing with multi-currency cross-border freight operations.
- **Amount:** The gross transaction value.
- **Tax Amount:** VAT or local taxes incurred (e.g., on spare parts or tolls).
- **Net Amount:** The total amount after taxes.

Party & Entity Mapping

- **Party Type:** Defines who is being paid or from whom money is received (e.g., Customer, Vendor, Employee/Driver).

- **Party Name:** The exact entity (e.g., specific logistics client, fuel vendor, or mechanic shop).
- **Employee / Driver ID:** Links the cash/bank transaction to a specific staff member, useful for tracking petty cash, travel advances, or driver per-diems.

Transport-Specific Dimensions (Analytical Tags)

- **Vehicle / Fleet Number:** Ties the expense (e.g., fuel, toll, maintenance) or revenue (freight payout) to a specific truck or trailer for per-vehicle profitability reporting.
- **Trip / Route ID:** Allocates costs or cash inflows to a specific logistical run.
- **Cost Center:** Department, branch, or depot associated with the transaction (useful for multi-branch transport companies).

Audit & Reference

- **Reference / Check No:** The check number, wire reference, or internal transaction ID.
- **Description / Narration:** Detailed notes regarding the transaction.
- **Attachments:** Digitized proof of delivery (POD), receipts, or invoices.

Budgets

1. Budget Identification & Master Data

- **Budget ID / Code:** Unique identifier for the budget record.
- **Fiscal Year:** The year for which the budget applies (e.g., 2026).
- **Budget Scenario / Plan Type:** Category of the budget (e.g., Operating, Capital Expenditure, Investment).
- **Organizational Unit / Cost Center:** The specific division, branch, or depot responsible for the budget (e.g., Dar es Salaam Terminal, Logistics Branch).
- **Currency:** The currency used for the budget entries (with corresponding exchange rates if dealing with cross-border logistics).

2. Time Horizon & Phasing

- **Period:** Interval for budget execution (Annual, Quarterly, or Monthly).
- **Start Date / End Date:** Validity period of the specific budget line.

3. Fleet & Asset Budgeting

- **Asset / Vehicle Class:** Categorization of vehicles (e.g., Heavy Duty Trucks, Refrigerated Vans, Cargo Vessels).
- **Asset / Fleet ID:** Optional field if entering budgets at an individual vehicle level.
- **Fuel Budget:** Estimated cost allocations for diesel/petrol, calculated as:

$$\text{Fuel Budget} = \text{Planned Kilometers} \div \text{Fuel Efficiency (km/L)} \times \text{Price per Liter}$$
- **Maintenance & Repair Budget:** Routine servicing, spare parts, and overhaul provisions.
- **Tires & Batteries Cost:** Variable maintenance allocation based on mileage.
- **Depreciation / Amortization:** Planned asset value reduction.

- **Tolls & Road Taxes:** Regional, national, or cross-border permit and toll estimates.

4. Operational & Variable Costs

- **Driver & Crew Wages:** Salaries, overtime, and per-diem (travel allowance) allocations.
- **Insurance Costs:** Fleet, cargo/goods-in-transit, and liability insurance premiums.
- **Cargo & Handling Expenses:** Costs associated with loading, transshipment, and warehousing.
- **Telematics & Communication:** Subscription costs for GPS tracking and Electronic Logging Devices (ELDs).

5. Revenue & Capacity Planning

- **Projected Freight Revenue:** Estimated income categorized by route, shipment type, or client.
- **Planned Trips / Mileage:** Expected transport activity determining capacity utilization.
- **Freight Rate per Ton/Kilometer:** Expected revenue yield.

TAX

1. Master Data & Jurisdictional Fields

These fields determine *where* the tax applies.

- **Departure Country/State:** The origin location of the freight or vehicle.
- **Destination Country/State:** The delivery or jurisdiction end-point.
- **Ship-From/Ship-To Codes:** Specific identifiers required for local US/regional tax calculations.
- **Tax Payer ID / Registration Number:** Vendor or Customer tax identification number.
- **Tax Exemption Certificate:** Fields indicating if the transport service qualifies for exemption (e.g., interstate transit).

2. Transaction & Service Fields

These fields categorize the specific transportation service being rendered.

- **Tax Code / Indicator:** The two-digit or alphanumeric system code used to automatically trigger tax percentages.
- **Tax Type:** Specifies whether it is Input Tax (paid on vendor/fleet expenses) or Output Tax (charged on client invoices).
- **Place of Supply:** Dictates whose local tax laws apply to the freight.
- **Commodity/Service Code (HS/UNSPSC):** Classifies the goods being shipped, which can alter tax rates.

3. Freight & Financial Proration Fields

These fields manage how the cost of moving goods interacts with the tax base.

- **Freight Charge Amount:** The base cost of transportation or logistics.

- **Prorate Freight & Tax Flag:** Defines if freight charges are prorated proportionally across all delivered items or assigned to a dedicated account.
- **Tax on Freight Base:** Indicator determining if taxes are calculated on the freight amount itself, or if freight is included in the total taxable base of the goods.
- **Tax Percentage Rate:** The specific numerical multiplier applied to the taxable amount.
- **Tax Amount:** The final calculated currency value of the tax.

4. Cross-Border & Customs Fields

Essential for international freight and logistics.

- **Incoterms:** Standardized terms (e.g., FOB, CIF) that determine which party is liable for taxes and duties.
- **Customs Duty Base:** Declared value of goods for customs processing.
- **Withholding Tax Code:** Indicates if a portion of the payment must be withheld for local tax authorities.

5. System Administration & Compliance

- **Tax Procedure:** The calculation schema the ERP uses to process the tax logic.
- **General Ledger (GL) Account Mapping:** Links the calculated tax values to the appropriate accounts in the balance sheet or income statement.

Exchange Rates

1. Basic Currency Identification

- **From Currency (Source/Transaction):** The foreign currency used for the specific transport or logistics transaction. (e.g., USD for international shipping rates).
- **To Currency (Base/Target/Local):** Your company's primary accounting or ledger currency. (e.g., TZS for Tanzania, or EUR for European hubs).
- **Rate/Conversion Type:** Defines the *purpose* of the rate (e.g., Spot Rate, Average Rate, Closing Rate, or Bank Selling/Buying rate).

2. Rate and Quotation Details

- **Exchange Rate:** The numerical value representing how much of the base currency is required to purchase one unit of the foreign currency.
- **Factor / Ratio:** Defines the mathematical relationship between the currencies, such as 1:1 or 1:100. (Frequently used for currencies like the Japanese Yen).
- **Quotation Method:**
 - *Direct (Standard) Quotation:* 1 Foreign Currency = X Base Currency.
 - *Indirect Quotation:* X Foreign Currency = 1 Base Currency.
- **Spread:** The difference between buying and selling rates configured for automated bank feeds.

3. Validity and Time Restrictions

- **Valid From Date (Effective Date):** The specific date (and sometimes time) from which the exchange rate becomes active for freight audits, invoices, and expenses.
- **Valid To Date:** The date the rate expires or is superseded by a newer rate.

4. Advanced ERP Fields & Configurations

- **Triangulation:** A setting indicating whether this currency can act as an intermediate, "anchor" currency to calculate two cross-currencies (e.g., converting TZS to EUR via USD).
- **Exchange Rate Date:** (Specifically used in shipment management) The date specified for buy and sell shipments that ensures all related costs and freight invoices use the exact same rate.
- **Decimal Precision:** Defines the number of decimal places for the exchange rate calculation (e.g., standardizing to 6 or 8 fractional digits).
- **Tolerance Limit:** The maximum allowable variance between a manually entered rate and the system's baseline rate.

Consolidation

1. Master Load / Consolidation Header Details

These establish the identity of the consolidated shipment and link the individual shipments together.

- **Consolidation/Master BOL Number:** Unique identifier for the combined master shipment.
- **Master Carrier Name:** The logistics provider or asset-owning transport company executing the master haul.
- **SCAC Code:** Standard Carrier Alpha Code for tracking routing.
- **Mode of Transport:** Truck, Rail, Ocean, Air, or Multimodal.
- **Equipment Type:** Trailer size, container type (e.g., 53ft dry van, 20ft container).

2. Shipment / Order Reference Data

Details imported from individual orders that make up the consolidation.

- **Child/House BOL or Shipment Number:** Identifies each individual shipment inside the consolidation.
- **Customer/Client Name:** The entity tied to the specific freight.
- **Sales/Purchase Order Number:** References for cross-referencing in finance or warehouse operations.

3. Parties and Location Data

Exact addresses and routing stops for the consolidated journey.

- **Origin Terminal/Port:** Where individual items are staged for consolidation.

- **Destination Terminal/Port:** Where the consolidation will be broken down (deconsolidated).
- **Ship-From Address & Ship-To Address:** The actual origin and final consignee for each consolidated package.
- **Notify Party:** Entity to be informed upon shipment arrival, vital for customs.

4. Cargo and Capacity Specifications

This data ensures physical compatibility and compliance when grouping different goods together.

- **Total Gross & Net Weight:** Calculated from the combined freight weights.
- **Total Volume / Cube:** The combined space the cargo will take up.
- **Total Piece Count:** Number of pallets, boxes, or skids being consolidated.
- **Hazardous Material (HAZMAT) Flag:** DOT/international designation ensuring dangerous goods aren't incorrectly paired.

5. Financials, Billing, and Compliance

Data governing revenue, expenses, and legal transport conditions.

- **Freight Terms:** Indicates if the shipment is Prepaid, Collect, or Third-Party Bill.
- **Accessorial Services:** Extra requirements like liftgates, residential delivery, or detention.
- **Incoterms:** Trade rules (e.g., FOB, CIF) that determine risk and responsibility.
- **Declared Value:** Value of the cargo for liability and customs purposes.

Payments

Core Transaction Fields

- **Payment Type:** Designates whether it is an incoming (Receipt) or outgoing (Payment) transaction.
- **Party Type / Role:** Identifies the entity (e.g., Customer, Carrier/Transporter, Driver, Vendor).
- **Party Name:** The exact account name of the customer, driver, or fleet operator.
- **Payment Mode:** The method of transfer (e.g., Cash, Bank Transfer, Cheque, Credit Card, or Fuel Card).

Financial & Bank Details

- **Company Code:** The specific business entity or branch originating the transaction.
- **Bank / Account Name:** The internal account from which money is withdrawn or received.
- **Payment Date:** The date the transaction is executed.
- **Posting Date:** The date the transaction affects the general ledger.
- **Currency:** The currency of the transaction. If dealing with international transport, this includes the Exchange Rate.
- **Amount:** The total value of the payment.

Transport & Logistics-Specific Fields

- **Reference Document Number:** Links the payment to an invoice, Waybill, or Bill of Lading (BOL).
- **Trip / Lorry Hire Memo Number:** Identifies the specific vehicle or journey associated with the expense.
- **Cost Center:** Allocates the payment to a specific fleet, branch, or department.
- **Deductions / Adjustments:** Captures subtractions for advance payments, cargo damage claims, or tolls.

Compliance & Tracking

- **Payment Terms:** Standard payment conditions (e.g., Net 30, Cash on Delivery/COD).
- **Payment Reference:** A unique code or transaction ID for bank reconciliation.
- **Narration / Remarks:** Free text area for notes (e.g., driver per-diem details, or specific trip exceptions).

Payroll

1. Employee Master Data & Demographics

These fields establish who the worker is and their contractual terms.

- **Employee ID / Name**
- **Job Title / Role** (e.g., Long-Haul Driver, Local Dispatch, Warehouse Staff)
- **Employment Type** (e.g., Full-time, Contract, Agency)
- **Department / Cost Center**
- **Pay Frequency** (e.g., Weekly, Bi-weekly, Monthly)
- **Tax Status & Statutory Info** (e.g., Tax Identification, Social Security, Pension or NSSF number for Tanzania)
- **Banking Details** (for direct deposit)

2. Time & Attendance (The Input Fields)

Transport workers often have irregular schedules requiring integration with GPS and Electronic Logging Devices (ELD).

- **Standard Hours Worked**
- **Overtime Hours** (e.g., standard time vs. double time)
- **Night/Shift Premium Hours**
- **Wait/Delay Time** (time spent loading/unloading)
- **Leave/Vacation/Sick Days Taken**

3. Trip & Operational Data (Variable Pay)

These are industry-specific fields where compensation is tied to vehicle and load performance.

- **Trip ID / Manifest Number**

- **Distance Driven** (e.g., total miles or kilometers)
- **Load / Tonnage Details** (e.g., cargo weight or volume)
- **Route / Location Zone** (for multi-state or cross-border zone pay rates)
- **Fuel Efficiency Bonus** (or fuel card deductions)

4. Allowances & Reimbursements

These fields cover non-taxable expense reimbursements or fixed transport stipends.

- **Per Diem** (daily meal and incidental allowance)
- **Overnight Allowance**
- **Safety / Clean Record Bonus**
- **Cell Phone / Communication Allowance**
- **Tool / Uniform Allowance**

5. Deductions & Net Pay

These calculate the adjusted gross down to the final pay.

- **Statutory Deductions** (e.g., Income Tax, Social Security Funds, Health Insurance)
- **Voluntary Deductions** (e.g., Union Dues, Health/Life Insurance)
- **Payroll Advances** (funds provided mid-trip)
- **Garnishments / Court-Ordered Deductions**

6. General Ledger (GL) Mapping

These fields categorize the payroll output for your accounting and finance modules.

- **Debit Accounts** (e.g., Driver Wages, Overtime Expense, Payroll Taxes)
- **Credit Accounts** (e.g., Cash / Checking Account, Accrued Liabilities)

DRIVER

1. Basic Identity & Contact Information

- **Full Name:** First, Middle, Last.
- **Date of Birth & Gender**
- **Contact Details:** Mobile phone, alternative phone, and email address.
- **Current Address:** Street, City, State/Province, Country, and Zip/Postal Code.
- **Home Terminal / Depot:** The default location the driver operates out of.
- **Emergency Contact:** Name, relationship, and phone number.

2. Qualifications & Certifications

- **License Information:** Commercial Driver's License (CDL) or local equivalent number, class/endorsements (e.g., Hazmat, Tanker), issue state/country, and expiration date.
- **Medical Information:** Medical examiner's certificate number, issue date, and expiration date.

- **Passport / Travel Documents:** Passport number, issue/expiry dates, and visa details for cross-border transport.
- **Background Checks & Safety:** TWIC card, Hazmat background check dates, and past road test certifications.
- **Training Certificates:** Dates and types of specialized internal safety or equipment handling training.

3. Employment & Payroll Configuration

- **Driver Type:** Company Driver, Owner-Operator, or Subcontractor.
- **Employment Status:** Active, on leave, terminated, or suspended.
- **Hire & Termination Dates:** Specific dates for tracking tenure.
- **Pay Scale Configuration:** Base rate details like pay-per-mile (loaded/empty), hourly rate, or percentage of load.
- **Tax Details:** Social Security Number (SSN) / Tax ID, tax filing status, and withholding information.
- **Fuel Advances:** Limits, thresholds, and preferred fuel card integration numbers (e.g., Comdata or EFS IDs).

4. Hours of Service (HOS) & Compliance

- **ELD/Telematics ID:** The unique identifier linking the driver to their Electronic Logging Device hardware or software.
- **HOS Cycle Rule:** Standard cycle rules (e.g., US 60-hour/7-day or 70-hour/8-day limits).
- **Home Terminal Time Zone:** Used to accurately track rest breaks and daily limits.

5. Operational & Telematics Settings

- **Assigned Vehicle:** Primary Tractor/Truck VIN or fleet ID.
- **Vehicle Qualifications:** Tags for the types of trailers or cargo the driver is certified to haul (e.g., Flatbed, Reefer, Dry Van).
- **Driver Preferences / Skills:** Routing limitations (e.g., no mountain routes, or specific loading certifications).
- **Language / Communication:** Preferred language for dispatch communications and mobile app settings.

VEHICLES

1. Basic Vehicle Identification & Specifications

- **Vehicle ID / Resource Number:** The system-generated unique internal identifier.
- **Registration Number / License Plate:** The public-facing ID for the vehicle.
- **Vehicle Identification Number (VIN) / Chassis Number:** Crucial for linking to OEM records and warranties.

- **Make and Model:** Manufacturer details (e.g., Scania, Mercedes-Benz).
- **Year of Manufacture:** Used for depreciation and compliance purposes.
- **Vehicle Type:** Category of the unit (e.g., Flatbed, Tanker, Box Van, Reefer).
- **Body/Structure Type:** E.g., Rigid truck, articulated tractor, or trailer.

2. Physical & Technical Specifications

- **Unladen Weight (Tare):** Weight of the empty vehicle.
- **Gross Vehicle Weight (GVW):** Maximum allowable total weight.
- **Payload Capacity:** Maximum weight of cargo the vehicle is legally permitted to carry.
- **Loading Volume:** Measured in cubic meters (m³) or pallet spaces.
- **Dimensions:** Length, Width, Height (essential for routing and bridge/clearance limits).
- **Number of Axles:** Impacts road tolls and classification.
- **Suspension Type:** E.g., Leaf spring or air suspension.

3. Compliance & Licensing

- **Registration Expiry Date:** Date the road license needs renewal.
- **Insurance Policy Number & Expiry:** Commercial vehicle liability and cargo insurance dates.
- **Roadworthiness Inspection Expiry:** Dates for mandatory safety/mechanical inspections.
- **Emissions Certificate:** Standard compliance rating (e.g., Euro IV, Euro VI).
- **Operating Permits:** Region-specific licenses (e.g., LATRA permits for Tanzania/East Africa).

4. Operations & Telematics

- **Ownership Status:** Owned, Leased, or Sub-contracted (Market Vehicle).
- **Vendor / Transporter Name:** Linked to third-party providers.
- **Fuel Type:** E.g., Diesel, Petrol, Electric.
- **Fuel Card Number:** Links the vehicle directly to corporate fuel accounts.
- **Telematics/GPS Device ID:** Connects the asset to live positioning and telematics systems.
- **Home Terminal / Depot:** The base location for dispatch and reporting.
- **Assigned Driver:** The primary driver linked to the truck.

5. Maintenance & Workshop Data

- **Current Odometer Reading:** Used to track distance-based maintenance.
- **Engine Number:** Identifier specific to the engine block.
- **Tire Size & Specifications:** Details for tire tracking and inventory management.
- **Battery Specifications:** Details for electrical system monitoring.
- **Last Service Date & Kilometers:** Tracks historic maintenance.

6. Financial & Asset Management

- **Asset Class / Account Code:** Links asset depreciation and value to the ERP's general ledger.
- **Purchase Date & Price:** Initial acquisition cost.
- **Fixed Asset Location:** Where the asset physically resides on the balance sheet.
- **Depreciation Method:** Straight-line or declining balance rules.

CLIENTS

1. General & Contact Information

- **Company Name / Legal Entity Name**
- **Trade Name / DBA** (Doing Business As)
- **Industry Type** (e.g., 3PL, Retail, Manufacturing, Wholesaler)
- **Account Status** (Active, Inactive, On-Hold, Prospect)
- **Primary Contact Person** (Name, Title, Department)
- **Contact Details** (Phone, Mobile, Email Address)
- **Website URL**

2. Billing & Financial Data

- **Tax Identification Number** (e.g., TIN, VAT Number)
- **Currency** (Multi-currency capability for international operators)
- **Payment Terms** (e.g., Net 30, Net 60, Cash on Delivery)
- **Credit Limit & Credit Status**
- **Billing Address** (Street, City, State/Province, Zip Code, Country)
- **Accounts Payable (AP) Contact** (Name, Email)
- **Tax Exemptions** (Status or certificate number)

3. Operational & Freight Profiles

- **Shipping Preferences** (e.g., LTL, FTL, Air, Ocean, Intermodal)
- **Preferred Carriers / Excluded Carriers**
- **Accessorial Requirements** (e.g., Liftgate needed, residential delivery, inside delivery)
- **Standard Operating Hours** for Pickups and Deliveries
- **Dock/Warehouse Constraints** (e.g., Forklift required, max pallet dimensions)
- **Hazardous Materials (Hazmat) Certification** (Yes/No with class codes)

4. Address Book / Location Matrix

- **Headquarters / Corporate Address**
- **Origin Facilities / Warehouses**
- **Destination / Consignee Locations**
- **Dock Scheduling / Appointment Requirements**

5. Compliance & Documentation

- **Insurance Requirements** (Minimum cargo value limits)
- **Brokerage / Carrier Authority** (e.g., Motor Carrier number)
- **Customs Broker Info** (For cross-border and international freight)
- **Contract / Service Level Agreement (SLA) Expiration Date**

6. System & Integration Fields

- **EDI / API Integration Keys** (For automated order intake)
- **Customer Portal Access** (Login credentials for self-service tracking)
- **Account Manager / Sales Representative Assignment**

- **Custom Tags / Notes** (Special instructions for dispatchers)

INVENTORY

1. Basic Item Identification & Classification

- **Item Code/SKU:** Unique identifier for the part, consumable, or material.
- **Item Name/Description:** Clear, standardized label of the part (e.g., "Heavy Duty Brake Pad - Front").
- **Category/Classification:** Broad groupings (e.g., Engine Parts, Tires, Lubricants, Office Supplies).
- **OEM Part Number:** Original Equipment Manufacturer number for accurate referencing.
- **Supplier Part Number:** The specific catalog number used by your vendor.
- **Unit of Measure (UoM):** How the item is stocked (e.g., Liters, Pieces, Kilograms, Boxes).

2. Fleet & Maintenance Specifics

- **Applicable Equipment/Fleet Type:** Vehicle make, model, or specific fleet asset tag the part is meant for (e.g., "Scania R450 Truck").
- **Part Condition:** New, Rebuilt, Remanufactured, or Used.
- **Asset Serial Number:** Required for high-value components (e.g., alternators, specialized pumps).
- **Hazardous Material (Hazmat) Flag:** Indicators for dangerous goods like lubricants, solvents, or batteries.

3. Purchasing & Financial Details

- **Standard Cost:** The expected purchase cost for budgeting.
- **Last Purchase Price:** The price paid on the most recent order.
- **Default Supplier/Vendor:** Primary company you buy the part from.
- **Tax Code:** Relevant taxation data for procurement.
- **Valuation Method:** Tracking type, such as Average Cost, FIFO, or LIFO.

4. Warehousing & Location

- **Storage Location:** Warehouse, depot, or specific locker.
- **Bin/Rack Number:** Exact physical location for fast picking by mechanics.
- **Batch/Lot Number:** Critical for tracking warranties or tracking dates for perishable items like tires or oils.
- **Manufacturing Date:** Date the item was produced.
- **Expiration Date:** Shelf life for items like coolant or specific rubber/chemical products.

5. Inventory Control & Reordering

- **Minimum Stock Level (Reorder Point):** The threshold that automatically triggers a purchase.

- **Maximum Stock Level:** Cap to prevent overstocking and tying up cash.
- **Safety Stock:** Buffer amount to protect against emergency breakdowns and supply chain delays.
- **Lead Time (Days):** The average time it takes for a vendor to deliver the part after ordering.
- **Economic Order Quantity (EOQ):** The ideal order size to minimize overall holding and ordering costs.

6. Warranty & Quality Control

- **Warranty Period:** Duration or mileage/hours guaranteed by the supplier.
- **Warranty Start Date:** Date from which the warranty is valid.
- **Quality Status:** Inspection status (e.g., Available, Quarantined, Awaiting Inspection).

WAREHOUSES

1. General Identification & Organizational Data

These fields define the warehouse's name and its hierarchical relationship within your business.

- **Warehouse Code / ID:** A short, unique alphanumeric identifier (e.g., DSM_MAIN) used across all ERP documents.
- **Warehouse Name:** The full descriptive name of the facility.
- **Facility Type:** Classifies the hub (e.g., Distribution Center, Cross-Dock, Transit Hub, Bonded Warehouse).
- **Company Code / Business Unit:** Associates the warehouse with the specific legal entity or financial division for tax and financial tracking.
- **Time Zone:** Vital for transport synchronization so the system aligns operating hours with global transit data.

2. Location, Address & Geocoding

Specific location data ensures exact routing and prevents miscommunication between dispatch and warehouse staff.

- **Street Address, City, State, Postal Code, Country:** The physical address of the facility.
- **Latitude & Longitude:** Exact geocodes used to feed routing and GPS fleet-tracking systems.
- **Address Reference/Alternate ID:** Used for third-party software mapping or courier integration.

3. Contact & Communication

Essential contact details to facilitate smooth operations between truck drivers and warehouse teams.

- **Facility Manager Name:** The primary point of contact for the facility.

- **Contact Number:** Phone or radio frequency used by drivers and carriers to coordinate arrivals.
- **Email Address:** Official communication channel for gate passes, discrepancies, or automated load alerts.
- **EDI/Communication Endpoint:** The electronic data interchange address for automated 3PL or supplier data exchange.

4. Shipping, Receiving & Dock Operations

In transport-heavy ERP systems, these fields dictate how freight loads interact with the warehouse.

- **Dock Capacity:** The total number of loading and offloading doors available.
- **Dock Scheduling Type:** Defines whether the warehouse uses appointment-based or open-arrival receiving.
- **Inbound/Outbound Calendar:** The operating hours or shifts assigned for trucks to drop off or pick up goods.
- **Staging Area Determination:** Identifies the specific floor zones where consolidated freight will be placed before loading.

5. Warehouse Capacity, Storage & Layout (WMS Rules)

These fields organize physical inventory and streamline pick/putaway rules in advanced ERP logistics modules

- **Storage Types:** Groups similar bins together (e.g., Bulk, Rack, Cold Storage, Hazardous Materials).
- **Storage Sections:** Subdivisions of storage types defining picking zones.
- **Bin Management:** Defines the logic for row, rack, and shelf positioning.
- **Handling Unit Management (HUM) Fields:** Defines packaging requirements (pallets, crates, or roll cages).
- **Capacity Limits:** Maximum weight, volume, or pallet limits the warehouse can hold.

6. Control & Operational Parameters

Rules that guide the system's ERP features to automatically route traffic, handle exceptions, and log movements.

- **Putaway Strategy:** Controls how the ERP determines where incoming goods go (e.g., fixed bin, empty bin, or closest to shipping dock).
- **Picking Strategy:** Determines how goods are retrieved (e.g., FIFO, LIFO, or partial pallet).
- **Inventory Count Method:** Indicates the system preference (e.g., Annual, Cycle Counting, or Continuous).
- **Status Flags:** Indicates whether the warehouse is **Active**, **Inactive**, or **Under Maintenance**.

PROCUREMENT

1. Vendor & Master Data

This information identifies the supplier and defines financial agreements.

- **Vendor/Supplier Name & ID:** The registered legal name of the business.
- **Vendor Address:** Headquarters and shipping/warehouse locations.
- **Contact Details:** Name, phone, and email of account managers.
- **Tax/Registration Number:** VAT or local business registration ID.
- **Payment Terms:** Net days, early payment discounts, or letters of credit.
- **Currency:** Transaction currency for international 3PL operations.

2. Purchase Order (PO) Header Details

Information governing the entire transaction or order document.

- **PO Number:** A unique, system-generated tracking number.
- **PO Date / Document Date:** The date the order is created.
- **Purchasing Organization/Company Code:** The internal department or branch handling the buy.
- **Buyer Name / Purchasing Group:** The specific person responsible for the transaction.
- **Status:** Draft, pending approval, approved, or closed.

3. Line Item Details

Specific details about each physical good or service being procured. []

- **Item Code & Description:** Standardized codes for vehicle parts, fuel, or services.
- **Quantity:** Number of units being ordered.
- **Unit of Measure (UoM):** Liters, pieces, boxes, tons.
- **Unit Price:** Cost per single unit.
- **Discount:** Percentage or flat amount off the base price.
- **Total Line Value:** Calculated amount (Quantity × Unit Price) - Discount.

4. Transport & Fleet Specifics (Industry Focus)

Unique operational fields that differentiate transport procurement from standard retail.

- **Asset / Fleet ID:** The specific truck, trailer, or vehicle license plate the part is for.
- **Maintenance Work Order (WO) Number:** Links the procurement to a specific repair or preventive maintenance (CMMS) event.
- **Cost Center:** The internal depot, terminal, or department absorbing the cost.
- **Project Code:** Associated project or contract.

5. Delivery & Logistics Execution

How and when the items are brought into the transport hub.

- **Required Delivery Date:** The deadline for parts to arrive.
- **Delivery Location / Plant:** The specific yard, warehouse, or garage.

- **Shipping Method:** Freight, courier, or will-call.
- **Incoterms:** International commercial terms (e.g., FOB, CIF) defining liability and shipping responsibility.

6. Financial & Accounting

Fields mapping the procurement to the company's ledger.

- **General Ledger (GL) Account:** The accounting category (e.g., Fuel Expense, Spare Parts Inventory).
- **Tax Code:** Applicable local sales taxes or import tariffs.
- **Landed Costs:** Additional freight, handling, or customs fees added to the total item cost.
- **Budget Check Status:** Indicates if the expense is within the allocated department budget.

7. Approvals & Audit Trail

Workflow controls for corporate compliance.

- **Requester:** The employee who initiated the purchase.
- **Approver(s):** Manager or director verifying the purchase.
- **Approval Date:** Timestamp of when the PO was authorized.

Compliance & Fleet Health

1. Fleet Health & Preventive Maintenance

These fields track mechanical diagnostics, usage, and service needs to maximize uptime and prevent unexpected breakdowns.

Vehicle Profile

- Vehicle ID / Unit Number
- Make, Model, and Year
- VIN (Vehicle Identification Number)
- License Plate and Registration State/Country
- Vehicle Type (e.g., Heavy Truck, Trailer, Tanker)
- Axle Configuration and Weight Capacity
- Odometer Reading (Current)
- Engine Hours (Current)
- Status (Active, Inactive, In Shop, Out of Service)

Diagnostics & Telematics (IoT Feed)

- Diagnostic Trouble Codes (DTCs)
- Fuel Consumption Rate
- Idle Time
- Battery Voltage
- Tire Pressure and Tread Depth

Maintenance Logs & Planning

- Last Service Date and Odometer

- Next Preventive Maintenance (PM) Due Date/Mileage
- Inspection Checklist Status (Pass/Fail)
- Work Order Number
- Parts Replaced and Associated Costs

2. Regulatory Compliance

These fields manage legal operating requirements, driver certifications, and documentation to prevent regulatory fines and audit failures.

Driver Management & Qualification

- Driver Name and ID
- Commercial Driver's License (CDL) Number and Class
- CDL State/Country of Issue
- License Issue Date and Expiration Date
- Medical Certificate Expiration
- Endorsements (e.g., Hazmat, Tanker)
- Driver Qualification File (DQF) Status
- Hours of Service (HOS) Log / ELD Status
- Safety Performance History (Accidents/Violations)

Vehicle & Operational Permits

- Certificate of Fitness
- Insurance Policy Number and Expiry Date
- Tax/Permit Information (e.g., IFTA, IRP, Hazmat Permits)
- Emission/Roadworthiness Inspection Certificates

Safety & Incident Management

- Incident Type (Accident, Breakdown, Traffic Violation)
- Date, Time, and Location (GPS or Geofence) of Incident
- Involved Driver and Vehicle IDs
- Police Report Number / Insurance Claim Status
- Cargo Damage Details

GPS WAYPOINT

1. Basic Coordinate & Location Data

These fields establish the exact physical spot on a map.

- **Waypoint Name / ID:** A unique alphanumeric code to identify the stop (e.g., WHSE-DAR-01).
- **Latitude:** The North/South coordinate (e.g., -6.7924 for Dar es Salaam).
- **Longitude:** The East/West coordinate (e.g., 39.2783).

- **Altitude / Elevation:** Height above sea level (critical for mountainous or specialized freight routes).
- **Coordinate System / Datum:** Defines the map format being used (most ERP systems use WGS 84).

2. Location & Facility Attributes

These fields define *what* the waypoint is and set specific parameters for that location.

- **Location Type:** Category of the stop, such as *Hub, Warehouse, Port, Customer Site, or Fuel Stop*.
- **Address:** Physical street address, city, and postal code for driver or administrative reference.
- **Geofence Radius:** The virtual boundary (in meters/feet) around the waypoint that triggers arrival or departure events.
- **Time Zone:** The specific time zone of the waypoint (important for cross-border or regional operations).
- **Contact Details:** On-site manager name, phone number, or operational hours for the facility.

3. Operational & Logistics Rules

These fields link the GPS coordinate to your ERP's supply chain functions.

- **Loading / Unloading Time:** The standard allocated time window for a vehicle to be serviced at this point.
- **Order / Manifest Number:** Links the location stop to a specific freight load or delivery order.
- **Required Equipment:** Notes for specialized facilities (e.g., *Forklift required, Reefer power supply*).
- **Access Restrictions:** Notes on constraints like *No night deliveries, Weight limits, or High-security area*.
- **Sequence / Priority Number:** The order in which the waypoint must be visited on a multi-stop route.

DAILY REPORTS

1. General Trip & Logistics Details

- **Trip ID / Lorry Receipt (LR) No:** The unique tracking identifier for the shipment.
- **Date & Time of Entry:** Logged automatically or manually for audit trails.
- **Origin Location & Destination:** Exact loading and offloading points.
- **Vehicle/Truck Number:** The specific asset assigned to the trip.
- **Trailer/Container Number:** Linked asset information for multi-part vehicles.

2. Fleet & Operation Status

- **Vehicle Status:** Current state (e.g., *In Transit, Delayed, Arrived, Offloaded*).
- **Current Odometer / Mileage:** Reading at the time of the report.

- **Load Weight / Volume:** Cargo capacity and utilized tonnage.
- **Goods/Commodity Type:** What is being transported (relevant for hazardous or regulated goods).
- **Shipment Discrepancies:** Notes on damages, shortages, or overages.

3. Driver & Workforce Details

- **Driver Name(s) & ID:** Primary and co-driver assigned.
- **Duty Hours / Logbook Status:** Driving time vs. rest time compliance records.
- **Driver Score:** Safety or driving behavior metric (e.g., harsh braking, idling).

4. Financials & Expense Logging

- **Trip Advances:** Cash or digital funds given to the driver before/during the trip.
- **Fuel Consumption:** Volume and cost of fuel filled.
- **Tolls & Parking Fees:** Road usage expenses logged.
- **Maintenance & Breakdown Costs:** Emergency repairs or mechanical issues.

5. Compliance & Documentation

- **Waybill / Delivery Note Reference:** Number tying the physical cargo to digital records.
- **Proof of Delivery (POD) Status:** Indicates whether the digital signature or image is uploaded.
- **Delay Reasons:** Codes or descriptions for traffic, border delays, or dock wait times.

USERS

1. Basic Account Information

- **First Name / Last Name:** Legal name of the employee.
- **Username:** Unique login identifier (often the company email).
- **Email Address:** Used for system alerts, password recovery, and client/vendor communication.
- **Phone Number:** Contact number for operational dispatch and logistics coordination.
- **Job Title / Role:** Employee position (e.g., Dispatcher, Fleet Manager, Driver, Warehouse Lead, Accountant).

2. Transport & Operations Roles

- **Assigned Branch / Location:** The physical terminal or hub the user manages.
- **Role / Permission Level:** System access constraints dictating visibility (e.g., booking vs. invoicing).
- **Driver ID:** Linked directly to the **driver's master profile** for transport tracking.
- **Vehicle / Fleet Assignment:** Specific fleet assets or vehicles assigned to the user.

3. Security, Compliance, & Telematics

- **Password / PIN:** Authentication credentials.

- **Employee / Driver Status:** Current work status (e.g., Active, On Leave, Suspended, Terminated).
- **License / Certification Number:** Required for drivers or hazardous material handlers.
- **Expiration Date:** Expiry date of licenses or safety certificates.
- **Telematics / GPS Access:** Permissions to view live vehicle tracking or ELD (Electronic Logging Device) data.

4. Financial & Audit Access

- **Employee Cost Center:** Department to which salary and travel expenses are charged.
